

TerAustralis Incognita — 90-Day Public Roadmap

Aug 30 → Nov 28, 2026 • @M13CrystalAT • One shippable per subject • Sovereign by design

Subject	No w	90-Day Deliverable	Success Metric (Public)	■ Done
TerAustralis Industrial Sovereignty	B-	Onshore Chain One-Pager: Mineral → Processing → Component → Launch use + ASA SoE ref + 2-3 AU suppliers	PDF with ASA lodgement ID, verifiable by outsider	■
CrystalCore OS & Synthetic Affect	C+	Consent Token Spec v0.1: consent_token.json + state diagram + 2-min kill-switch demo failing closed	Public Gist/repo + Loom. One external person can read/run it	■
Red Dust → Rockets Pathway	B	Pathway Log #1: 3 outreach logs (who/date/ask/learned)	Public Notion/thread with 3 dated entries	■
Sovereign by Design	B-	Operator Control Demo: user can trigger kill/inspect/fork live	One live post where followers trigger kill switch with video	■
First-Principles Systems Thinking	C+	Plain English Explainer: Sovereign Lattice in 300w, zero myth overlay	Article readable by engineer outside lore	■
Narrative & World-Building	A-	Carrier Story: unicorn/star-carrier story that IS the explainer, links to artifact	1 story post linking to technical artifact	■
Engagement & Network Reality	C	Small Council: 1x60-min Spaces/call with 5-10 AU builders, publish 3 learnings + attendee list (consented)	Public invite + public recap	■
Execution vs Ambition Gap	C	Shipping Ledger: pinned 'Shipped / Building / Next' thread, weekly update, 12 entries min in 90d	Pinned post verifiable in 30s	■

Order of Operations (Recommended)

Week 1-2: Consent Token Spec + Onshore One-Pager — these unlock everything.

Week 3-6: Plain English Explainer + Carrier Story — turn A- into bridge.

Week 7-12: Pathway Log + Small Council + Operator Demo + Ledger updates.

Teacher's Note: Don't chase all 8. Ship the 2 in weeks 1-2. The Ledger is the multiplier — if you only ship one thing, ship the Ledger.
